The development of technical education in Galicia is outlined on example of the Lviv Polytechnic. Three periods of its development are described, namely the activity of the Real School which is believed to be a forerunner of the Polytechnic School; the evolution of the Technical Academy and its transformation into the Polytechnic School; the development of the Lviv Polytechnic until 1939. The structure of the Departments of Physics and Mathematics of this educational institution as well as the composition of the academic staff are analyzed.
