MATHEMATICAL METHODS and PHYSICOMECHANICAL FIELDS

SCIENTIFIC JOURNAL FOUNDED IN 1975

Vol. 51, No. 3 L'viv **2008**

C O N T E N T S

Pidstryhach Institute of Applied Problems of Mechanics and Mathematics of National Academy of Sciences of Ukraine (to the 30-th anniversary) 7

Makarov V. L., Demkiv I. I. On connection of interpolating integral continued fractions with interpolating branched continued fractions 13

Pelykh V. O. Dominant energy condition and Sen – Witten special orthonormal frame 21

Grigoryan F. P. On splitting of linear non-stationary systems of differential equations 29

Lavrenyuk S. P., Panat O. T. Unboundedness of solutions of one hyperbolic third order equation 36

Podlevskyi B. M. Numerical solution of some two-parameter eigenvalue problems 46

Khoroshun L. P. Thermodynamic and statistical principles of the theory of elastoviscoplastic deformation and strengthening of materials 52

Kaminsky A. A., Selivanov M. F., Chornoivan Yu. O. Determination of effective properties of viscoelastic composite with relaxation of components in a form of different fractional exponents 69

Dolia E. V., Chervinko O. P., Senchenkov I. K. Thermal instability of layered viscoelastic rectangular prism sustaining high frequency shear loading .. 80

Karnaukhov V. G., Sichko V. M., Karpenyuk A. S. Influence of physical nonlinearity on resonant vibrations and dissipative heating of inelastic rectangular plates 90

Selezov I. T. Evolution equation of surface gravity wave propagation in the presence of bottom excitation 99

Vaysfeld N. D., Popov G. Ya., Salenko S. D. Determination of wave field inside hollow cone with cutout parallel to cone generatrix 105

Grigorenko A. Y., Efimova T. L., Loza I. A. Solution of axisymmetric problem on free vibrations of piezoceramic hollow cylinders of finite length by spline-collocation method 112

Loboda V. V., Khodanen T. V. Problem of thermoelectromagnetoelastycity for piezoelectric/piezomagnetic bimaterial with interface crack 121

Molchenko L. V., Loos I. I. Deformation of circular cylinder of variable stiffness in magnetic field in geometrically nonlinear formulation 133

Shul'ga M. O. On relations of electromagnetism in international and Gaussian systems of units 139

Maksymuk O. V., Shcherbyna N. M., Makhnic'kyi R. M., Hanulich N. V. Stress-strain state and stability of polymeric tubes with honeycomb wall 145

Tokovyy Yu. V., Hung K.-M., Ma C.-C. Determination of stresses and displacements in a thin annular disk subjected to diametral compression 152

Martynyak R. M., Chumak K. A. Identical thermal distortivity half-spaces thermoelastic contact in presence of permeable to heat interfacial gap 163

Bogdanov V. L. Influence of initial stresses on fracture of composite materials containing interacting cracks 176

Rushchitsky J. J. Fragments of the theory of nanotransistors: self-switching of plane transverse hypersound wave in nonlinearly elastic nanocomposite materials 186

Datsko B. Y., Gafiychuk V. V. Mathematical modeling of fractional reaction-diffusion systems with different order time derivatives 193

Hachkevych A. R., Terletskii R. F., Brukhal M. B. Some problems of mathematical modeling in thermomechanics of solids of various transparency subjected to thermal radiation 202

Nyashin Y. I., Simanovskaya E. Y., Lokhov V. A., Tverier V. M. Biomechanics of the human dentofacial system 220

NEW ITEMS AND INFORMATION

To the 70-th birth anniversary of academician V. D. Kubenko 225

To the 60-th birth anniversary of professor V. S. Popovych 227

To the 60-th birth anniversary of professor G. T. Sulym 229

To the 60-th birth anniversary of professor Ye. Ya. Chapla 231

The 2-nd International Conference «Modern Problems of Mechanics and Mathematics» 233

Stepan Yakymovych Yarema (19.10.1926–09.06.2008) 235
