MATHEMATICAL METHODS and PHYSICOMECHANICAL FIELDS

SCIENTIFIC JOURNAL

FOUNDED IN 1975

Vol. 52, No. 3

L'viv 2009

CONTENTS

| | |
|--|----|
| <i>Gutik O. V., Reiter A. R.</i> Symmetric inverse topological semigroups of finite rank $\leq n$ | 7 |
| <i>Podlevskiy B. M.</i> On one approach to finding the branching lines and bifurcation points of solutions of nonlinear integral equations the kernels of which analytically depend on two spectral parameters | 15 |
| <i>Shakhno S. M.</i> Convergence of inexact difference methods under the generalized Lipschitz conditions | 30 |
| <i>Uvarova C. A.</i> R -functions method as supportive extension for Ritz method and least squares method | 41 |
| <i>Dmytryshyn Yu. B.</i> Dynamic boundary-value problems without initial conditions for almost linear parabolic equations | 47 |
| <i>Bomba A. Y., Fursachyk O. A.</i> Inverse singularly perturbed problems of convection-diffusion type in quadrangular curvilinear regions | 59 |
| <i>Sukhorolsky M. A., Liubyt'ska O. Z.</i> Summation of multiple trigonometric series by generalized methods formulated by using δ -like finite functions | 67 |
| <i>Dyyak I. I., Prokopyshyn I. I.</i> Convergence of Neumann parallel scheme of domain decomposition for frictionless elastic multibody contact problems ... | 78 |
| <i>Prokopovych I. B.</i> Independence principles in equations of state of the deformable material | 90 |

| | |
|--|-----|
| <i>Grigorenko A. Ya., Efimova T. L., Sokolova L. V.</i> About an approach to study free vibrations of cylindrical shells with variable thickness in a circular direction within refined theory | 103 |
| <i>Kozlov V. I., Karnaukhova T. V., Peresun'ko M. V.</i> Numerical modeling of active damping of forced thermomechanical resonance vibrations of viscoelastic shells of revolution by piezoelectric inclusions | 116 |
| <i>Ghazaryan K. B., Ghazaryan R. A., Mikilyan M. A.</i> Magnetoelastic vibrations of electrically conductive elastic layer in longitudinal magnetic field | 127 |
| <i>Kravchyshyn O. Z., Chekurin V. F.</i> Iterative method of solution for initially boundary-value problem on propagation of elastic disturbance in inhomogeneously strained body | 133 |
| <i>Selezov I. T., Kuznetcov V. N., Chernikov D. O.</i> Generation of surface gravity waves by bottom time-repetitive pulses | 140 |
| <i>Meleshko V. V., Newton P. K., Ostrovskiy V. V.</i> Stability of point vortex configurations on a sphere | 146 |
| <i>Nikolaev A. G., Scherbakova Y. A.</i> Apparatus and applications of generalized Fourier method for transversally isotropic bodies bounded by surface and paraboloid of rotation | 160 |
| <i>Vlasyuk A. P., Martinyuk P. M.</i> Numerical solution of 3-D soil filtration consolidation problems taking into account salt and heat transfer by the radial basis function method | 170 |
| <i>Morgunov M. O., Ostriuk V. I., Ulitko A. F.</i> Contact with tearing off under bending of elastic strip by rigid disk | 182 |
| <i>Harmatiy H. Yu., Popovych V. S.</i> Thermoelastic state of unbounded thermosensitive body with cylindrical cavity under condition of convective heat exchange | 192 |
| <i>Solyar T. Ya.</i> Definition of non-stationary temperature fields and stresses in piece-wise homogeneous circular plates on the basis of numerical-analytical Laplace inversion formula | 201 |
| <i>Chernyak M. S.</i> Interaction between crack and cylindrical inclusion under heating and body extension | 209 |
| <i>Gristchak V. Z., Pogrebitskaya A. M.</i> Double asymptotic decomposition in the problem of radiant heat exchange of circular edges of trapezoidal form . . | 217 |
