SCIENTIFIC JOURNAL

FOUNDED IN 1975

Vol. 53, No. 3

L'viv **2010**

CONTENTS

<i>Kushnir R. M., Maksymuk A. V., Marchuk M. V., Osadchuk V. A.</i> Scientific achievements of the professor Bohdan Lyubomyrovych Pelekh on the theory of thin-walled elements of structure and mechanics of composites, and development (to the 70-th birth anniversary)	7
<i>Kuchmins'ka Kh. Yo.</i> On Worpitzky-like theorems for two-dimensional continued fraction	17
<i>Plachta L. P.</i> Remarks on tiled tori	27
<i>Kyrchei I. I.</i> Determinantal representation of the generalized Moore – Penrose inverse matrix over the quaternion skew field	36
<i>Demkiv I. I.</i> Interpolation functional third order polynomial which does not use substitution rule	46
<i>Protsakh L. P., Savenko P. O., Tkach M. D.</i> Branching of solutions of problem of mean-square approximation of real finite function with respect to two variables by double Fourier transformation modulus	60
<i>Bilusyak N. I., Ptashnyk B. Yo., Repetylo S. M.</i> Boundary-value problem with mixed conditions for weakly nonlinear hyperbolic equations	74
<i>Shchogolev S. A.</i> On some resonance cases in quasi-linear differential systems with slowly varying parameters	85
<i>Chekhov V. N., Zakora S. V.</i> Stress concentration in a spherical shell with two neighboring circular holes	93

<i>Butrak I. O., Kil'nytska T. I., Khay O. M.</i> Dynamic contact of a spherical inclusion with matrix at incidence of elastic wave	99
<i>Obodan N. I., Guk N. A.</i> Identification of inverse problems of thin-walled shells deformation by decomposition method	105
<i>Vasil'ev K. V., Sulym G. T.</i> Application of direct method of cutting to solve problem of longitudinal shear of wedge with thin inclusions of arbitrary orientation	117
<i>Grigorenko A. Ya., Müller W. H., Wille R., Yaremchenko S. N.</i> Numerical solution of the problem on the stress-strain state in hollow cylinders by means of spline-approximations	127
<i>Loza I. A.</i> Torsion vibrations of piezoceramic hollow cylinders with circular polarization	135
<i>Kunets' Ya. I., Rabosh R. V.</i> Longitudinal shear of elastic medium with thin rectilinear peaked piezoelectric inclusion of low rigidity	141
<i>Kirichenko V. V.</i> Geometric analysis of Hesse gyroscope motions	148
<i>Patsegon N. F., Popova L. N.</i> Spatial structures in magnetizing fluids	159
<i>Havrys' O. P.</i> System of generalized nonlinear boundary conditions for boundary-value heat conduction problem for a layer at two-sided local high-temperature coating	170
