MATHEMATICAL METHODS and PHYSICOMECHANICAL FIELDS

SCIENTIFIC JOURNAL FOUNDED IN 1975

Vol. 55, No. 3 L'viv **2012**

C O N T E N T S

Shavarovskii B. Z. On a triangular form of polynomial matrix and its invariants with respect to semiscalar equivalence 7

Prokip V. M. On normal form with respect to semiscalar equivalence of polynomial matrices over a field 21

Podlevskyi B. M., Yaroshko O. S. Newton's method for solving the inverse spectral problem 27

Fedorchuk V. I. On partial preliminary group classification of non-linear five-dimensional d'Allembert equation 35

Kuzakon V. M., Shelekhov A. M. K-generalized G-structures 44

Il'kiv V. S. Conditions of non-uniqueness of solution for Dirichlet problem in a unit disk in terms of differential equation coefficients 49

Kirillova O. I., Popov V. G. Stress state in an infinite cylinder of arbitrary cross section with a tunnel defect under harmonic oscillations of longitudinal shear 61

Breslavsky I. D., Avramov K. V. Influence of boundary conditions nonlinearity on free vibrations of plates at their geometrically deformation 72

Solyar T. Ya. Transient and steady-state dynamic stresses under antiplane strain of bodies with cracks 82

Grigorenko A. Ya., Zolotoy Yu. G., Prigoda A. P., Zhuk I. Yu., Khorishko V. V., Ovcharenko A. V. Experimental investigation of dynamic characteristics of thick-walled cylindrical shell by method of holographic interferometry 93

Yankovskii A. P. Visco-plastic dynamics of metal-composite shells of layered-fibrous structure under loadings of explosive type. II. Discussion of results of calculations 99

Lila D. M. Stability loss mechanism of rotating composite plane circular disc . . . 111

Nykolyshyn M. M., Diveyev B. M., Smol'skyi A. H. Frequency characteristics of elastically clamped cantilever layered beams 121

Grigorenko Ya. M., Avramenko Iu. A. To the solution of the static problems for toroidal shells with clamped ends in the refined formulation 127

Bogdanov V. R., Sulym H. T. Plane strain state in compact specimen with stable crack with taking into account process of unloading 132

Panin S. V., Martynyak R. M., Shvets R. M., Yatskiv O. I., Bobyk B. Ya. Thermostressed state of cylinder with thin surface layer having time dependent thermal properties under heating by volume heat sources 139

Nazarenko L. V. Effective properties of composite materials strengthened by orthotropic fibers with taking into account physical nonlinearity of components 153

Povstenko Y. Z. Fundamental solutions to Robin boundary-value problems for time-fractional heat conduction equation in a half-line 164

Maksymenko-Sheyko K. V., Sheyko T. I. Mathematical modeling of thermal conditions of electronic boards with sources distribution as the «Sierpinski's carpet» 170
