## CONTENTS

<i>Bondarenko V. M., Styopochkina M. V.</i> On transitivity coefficients for minimal posets with non-positive quadratic Tits form . . . . .	5
<i>Koporkh K. M., Zarichnyi M. M.</i> On the space of open maps of the Cantor set . .	15
<i>Gutik O. V., Pozdniakova I. V.</i> On the semigroup which is generated by extended bicyclic semigroup and $\omega$ -closed family . . . . .	21
<i>Grigorenko Ya. M., Bepalova O. I.</i> The generalized finite integral transformations method in linear and nonlinear static problems for shallow shells . .	35
<i>Stankevych V. Z.</i> Analysis of 3-D problems of dynamic loading of elastic piecewise-homogeneous bodies with internal cracks . . . . .	54
<i>Sulym H. T., Pasternak Ia. M., Tretyak T. V.</i> Modeling of deformable thermoelastic thread-like inclusions in isotropic medium . . . . .	73
<i>Protsiuk B. V.</i> Determination of static thermoelastic state of layered thermosensitive plate, cylinder and sphere . . . . .	87
<i>Piddubniak O. P., Piddubniak N. G.</i> Non-stationary temperature distribution in a thermally insulated concentric cylindrical channel with biomass moving under the influence of rotation of electrically heated helix . . . . .	107

<i>Kryvyi O. F., Morozov Yu. O.</i> The influence of concentrated forces and heat sources on the distribution of stresses in the interface of two different transversely isotropic half-spaces .....	124
<i>Yankovskii A. P.</i> Modeling of thermoelastoplastic deformation of reinforced plates. I. Structural model of the reinforced medium.....	137
<i>Kalynyak B. M.</i> Temperature fields that do not cause stresses in an inhomogeneous axysymmetric hollow cylinder .....	149
<i>Maksymovych O. V., Lazorko O., Solyar T. Ya.</i> Studies of two-dimensional gravitational stresses in anisotropic media based on integral Sherman-type equations .....	161
