Plachta L. P.

The combinatorics of gradient-like flows and foliations on closed surfaces: II. The problem of realization and some estimates

7

Makhney A. V.

Asymptotic behavior of eigenvalues and eigenfunctions of singular differential operator on a finite interval

17

Gavryliv O. S., Ostapovych B. S., Chabanyuk Ya. M.

Description of compressing subgroup on Decart's product of abstract Wiener spaces

26

Yeleyko Ya. I., Buhriy N. V.

Asymptotics of Laplace transform of distribution in which a tail is regularly varying function with exponent -1

30

Podlevs'kyj B. M.

Numerical method for solution of one class of nonlinear spectral problems

34

Zhydyk U. V.

On generalized boundary meanings of solution of 2  $m$  order almost linear elliptic equation

39

Gis O. M., Topolyuk Yu. P.

The mean square approximation of nonnegative finite functions by the modulus of functions with the finite spectrum (the case of vanishing solutions of approximation on support the finite function)

48

Bulacyk O. O., Voitovich N. N.

Analytical presentation of solutions of nonlinear integral equation of approximation problem of compactly supported functions with free phase by functions with bounded discrete spectrum

55

Revenko V. P. Determination of exact solution of Gelfand - Levyitan - Marchenko integral equation for Sturm - Liouville operator with step-potential	64
Maksymovych V. M., Solyar T. Ya. Joint application of generalized method of separation of variables and Laplace transform to 3D problems of non-stationary heat conduction	70
Zhuravchak L. M. Solution of spatial nonlinear problems of elasticity theory by combination of near-boundary elements and non-classical difference scheme	76
Maksymuk A. V., Shcherbyna N. N. Solution of linear boundary-value problems for thin-walled elements of constructions with variable characteristics using numerical-analytical method	85
Kurpa L. V., Kurpa L. I., Shmatko A. V. Computer simulation and solution of problems of thin plates and shallow shells theory	92
Pyryev Yu. O. Investigation of peculiarities of thermoelastic contact of two bodies with nonlinear dependence of thermal resistance on loading taken into account	100
Lobanova L. S. Thermal disturbance of stressed state of cylinder by suddenly applied surface forces on its ends	107
Selezov I. T., Avramenko I. V. Evolution of nonlinear wave packages taking into account surface tension at the interface	113
Kostushko I. A., Kuzemko V. A. Elastic-plastic plate with crack of normal separation	123
Kryven V. A. Plasticity zones in the neighborhood of two near parallel cracks under the longitudinal shear	127
Kushnir R. M., Pjanylo Ya. D., Pjanylo A. Ya. Comparative analysis of operational methods of solution of heterodiffusion problems	135
Onyshko O. Ye., Astashkin V. I.	

Calculation of phase and stress state of console element of temperature indicator under force loading	142
Polishchuk N. <sup>2</sup> .	
Stressed-strained state optimization of composite multi-layer isotropic cylinders with residual stresses	146
Berbjuk V. Ye.	
Synthesizing optimal semi-passive control for given law of motion of nonlinear mechanical systems	153
Gachkevich A. R., Gachkevich Ĭ. G., Kasperski Z., Trishch B. Ĭ.	
Optimal heating by external media and thermal sources of glass compound shell system	158
Burak Ya. Yo., Kondrat V. F.	
Nonlinear equations of state of electrical conductive thermosensitive elastic bodies	167
Naumenko Yu. V.	
Numerical simulation of rotating flows by "marker-and-cell" method	171
