**CONTENTS**

---

Plachta L. P.

The combinatorics of gradient-like flows and foliations on closed surfaces: III. The problem of realization and some estimates

7

Gryshko Yu. V.

On monochromatic symmetric subsets at 2-colorings of groups

17

Gutik O. V., Pavlyk K. P.

$H$ -closed topological semigroups and Brandt  
-extensions

26

Gavryliv O. S.

About structure of Banach separable space

29

Kirchey I. I.

Classical adjoint for Hermitian matrix over quasi-field

33

Podlevs'kyj B. M.

On application of symmetrization method to one class of generalized eigenvalue problems with parameter in boundary conditions

49

Buriaczenko K. O.

Existence and regularity of solution of some boundary-value problem for the third-order differential equations

56

Balins'kyj A. I.

Divided-difference method of solution of Yang - Baxter quantum equation

66

Savenko P. O. Numerical solution of nonlinear synthesis problems of irradiating systems using the power criterion	72
Mykhas'kiv V. V. Construction of integral representations of solutions of 3D elastodynamic crack problems via Papkovich - Neuber relation	82
Ostrik B. I., Ulitko A. F. Contact problem for interface semi-infinite crack	88
Karnaukhov V. G., Kozlov V. <sup>2.</sup> , Zhuk Ya. I., Karnaukhova O. I. Thermomechanical coupled theory of multilayered shells with passive physical nonlinear nonelastic layers and piezoelectric distributed inclusions for control of unsteady vibrations	96
Hachkevych O. R., Kurnyc'kyi T. L., Terlec'kii R. F. Mathematical simulation of photostimulated admixture diffusion in semi-transparent solids	107
Chekurin V. F. Thermoelasticity model of solids with initial elastic strains	120
Rogowski B. Heat conduction problem in a transversally isotropic body with a circular crack system	128
Maksymovych V. I., Hevorgyan V. V., Solar O. Ya Determination of stationary and nonstationary temperatures in multiply connected space and layer	135
Yevtushenko I. I., Semerak V. M. High-speed local heating of half-space surface by linear distributed heat flow	140
<i>Dedicated to the 70-th birth anniversary of M. Yu. Shvajko</i>	147
