**CONTENTS**

---

*Vasylykiv Ya. V.*

Remark to conditions of  $\lambda$ -type finiteness of entire function

7

*Antonova T. M.*

Some properties of branched continued fractions with non-positive partial numerators

11

*Babjak-Biletska L. S., Horbachuk O. L.*

Inverse problem for inhomogeneous evolutionary equation, in which right hand side is the trihometric polynomial

16

*Bodnar D. I., Hladun V. R.*

Sufficient conditions of stability of branched continued fractions with positive elements

22

*Hojenko N. P.*

On convergence of Nörlund's branched continued fraction in the case of real variables

28

*Zagorodnyuk A. V.*

The infinite-dimensional holomorphy and differential forms on Banach spaces

31

*Kopych M., Prykarpatsky A.*

On Korteveg-de Vriese quation, Markov semi-groups and their mechanical interpretation

35

*Lyzun O. Ya.*

Representation of the entire functions of minimal growth by canonical produkt

38

*Maslyuchenko V. K., Mykhajlyuk V. V., Shyshyna O. I.*

Joint continuity of horizontal quasi-continuous mappings with values in $\sigma$ -metrizable spaces	42
<i>Mykytyuk I. V.</i>	
Restricted Poisson mappings	47
<i>Mykytyuk L. Ya., Sheremeta M. M.</i>	
On the convergence rate of partial sums of Dirichlet series	50
<i>Puzyr'ova I.</i>	
Symmetric analytic functions on $L_p$	56
<i>Skaskiv O. B., Trusevych O. M.</i>	
On exceptional sets in asymptotic equality between the sum and the maximal term of a positive series that similar to Taylor-Dirichlet series	61
<i>Filevych P. V., Sheremeta M. M.</i>	
Analytic in the unit disk functions of regular growth	65
<i>Lopushansky O. V., Dmytryshyn M. I.</i>	
An interpolation of exponential type vectors, the complex method	71
<i>Mytrofanov M. A.</i>	
Approximations of continuous functions on complex Banach spaces	76
<i>Shuvar B. A., Uhryn S. Z.</i>	
Two-sided differential unequalities with nonlipschitz right parts	82
<i>Artemovych O. D.</i>	
Solvable groups with many $\pi$ -subgroups	86
<i>Gutik O. V., Pavlyk K. P.</i>	
Embeddings of topological semigroups	90
<i>Babych N. O.</i>	
Highfrequency asymptotics of vibrations in the problem with perturbed mass	

*Bokalo M. M., Dmytriv V. M.*

On Fourier problem for parabolic equations with nonlocal boundary condition

105

*Yeleyko Ya. I., Hryshchuk R. T.*

On one stochastic price formation model of shares

113

*Kinash O. M.*

On asymptotics of Perron root of transition intensity matrix. General case

117

*Hrytsyna O. R., Nagirnyy T. S., Chervinka K. A.*

Mechanithermodiffusion processes in strained plate with allowance for the effects of interface nonhomogeneity

123

*Domans'kyj P. P., Voloshenyuk A. V.*

On increase of critical parameters in the problems of movement stability in two measures for elastic cylindrical bodies

128

*Zhuravchak L. M.*

Solving of the spatial non-stationary problem of the heat conductivity for a zonal-homogeneous thermosensitive solid

137

*Kondrat V. F.*

To formulating equations for electrodynamics of porous saturated media moving slowly

143

*Moroz H. I.*

On correctness conditions for boundary value problems of the linear theory of elasticity

149

*Musiy R. S.*

Dynamic centrally-symmetric problem of electromagnetthermoelasticity for electroconductive sphere

155

*Chernukha O. Yu.*

Diffusive processes in a three-dimensional random nonhomogeneous two-phase semispace with sphere inclusions

160
