NATIONAL ACADEMY OF SCIENCES OF UKRAINE

PIDSTRYHACH INSTITUTE OF APPLIED PROBLEMS OF MECHANICS AND MATHEMATICS

Scientific Journal "MATHEMATICAL METHODS and PHYICOMECHANICAL FILDS"

Year 2002, Vol.45

Vol. 45, No.2, L'viv 2002

CONTENTS

Kalenyuk P. I., Kohut I. V., Nytrebych Z. M.

Differential-symbol method of solving the non-local boundary-value problem for partial differential equation

7

Vorobec' M. B.

Two-point problem for a system of partial differential equations of the second order by time

16

Sagajdak R. V.

On one inverse problem for two-dimensional parabolic-type equation

22

Shuvar B. A., Kostyshyn L. P

Application of one aggregate-iterative method to boundary-value problems

31

Povstenko Yu. Z., Derkach S. B

Use of the collocation method for solving the diffusion type equations with non-local boundary conditions

37

Pukals'kyj I. D

Dirichlet's problem for singular elliptic equations

42

Bomba A. Ya., Kashtan S. S.

Nonlinear inversions of boundary-value problems on quasiconformal mappings at modelling pressure gradients influence on filtration process

49

Kuzakon' V. M.

Generalized fiber bundles

58

Bulatsyk O. O., Voitovich N. N., Gis O. M

Branching of solutions of nonlinear equations from modified phase problem

64

Bernakevich I. E., Vahin P. P., Shinkarenko G. A.

Mathematical model of acoustic shell-fluid interaction. I. Formulation and solvability of the variational problems

75

Terlec'kyy R. F.

Thermomechanical behavior model of multicomponent deformable low-electroconductivity solids in electromagnetic field. I. Balance laws of mechanics and the second law of thermodynamics

81

Ostrik V. I., Ulitko A. F.

Contact interaction between two elastic cones

92

Vasylenko A. T., Klymenko N. I

Stressed state of anisotropic layered cylinder at eccentric axis of rotation

98

Kharun I. V., Loboda V. V.

Interface cracks with contact zones in a field of concentrated forces and torques

103

Nemirovskii Yu. V., Yankovskii A. P.

Heat conduction of thermosensitive structures with a system of tubes, filled with moving viscous heat-carrier

114

Yevtushenko O. O., Semerak V. M.

Plane mixed quasi-stationary heat conduction problem for half-space

124

Tymoshchuk P. V.

Macromodelling of modulated signals detectors on the basis of methods of analytic signal and energetic operators
