NATIONAL ACADEMY OF SCIENCES OF UKRAINE

PIDSTRYHACH INSTITUTE OF APPLIED PROBLEMS OF MECHANICS AND MATHEMATICS

Scientific Journal "MATHEMATICAL METHODS and PHYICOMECHANICAL FILDS"

Year 2002, Vol.45

Vol. 45, No.3, L'viv 2002

CONTENTS

Dzhaluk N. S., Petrychkovych V. M.

On common monic divisors of polynomial matrices with given canonical diagonal form

7

Prokip V. M.

About structure of some sets of divisors of matrices over the principal ideal domain

14

Szavarovs'kyj B. Z

On classification to within similarity of class of matrix pairs of the sixth order

22

Shchedryk V. P.

Non-associated matrices with standard Φ-skeleton

32

Podlevs'kyj B. M.

One method of determination of amount of multiple roots of algebraic polynomials

45

Gavryliv O. S., Ostapovych B. S., Chabanyuk Ya. M.

On the question of contractive semi-group on Cartesian products of abstract Wiener spaces

51

Sushch V. N.

On some differential-difference analogue of mixed problem for wave equation

54

Tymoshchuk P. V., Stoliarchuk R. R.

Mathematical macromodeling of nonlinear systems by integral-differential and corresponding discrete equations

62

Bomba A. Ya., Kashtan S. S.

Nonlinear inversions of boundary-value problems on conformal mappings with controlling potential

69

Burak Ya. Yo., Chernukha O. Yu., Moros H. I.

On correctness conditions for one class of boundary-value problems for admixture mass transfer by two ways

77

Savula Ya. G., Dyiak I. I., Dudash O. I.

Heterogeneous numerical scheme of domain decomposition technique to study plasticity problems

85

Yatskiv O. I., Shvets' R. M.

Construction of solution for mechano-diffusion problem on two-component diffusive saturation and stressed state of layered cylinder

91

Vasylenko A. T., Sudavtsova G. K.

Stressed state of inhomogeneous orthotropic shells of revolution under action of asymmetric centrifugal loads

103

Vahin P. P., Malets R. B., Shynkarenko G. A.

Thermoelastic analysis of flexible shift shells in quasistatic approximation

108

Kit H. S., Stankevych V. Z.

Releigh wave diffraction on surface crack in half-space

118

Zavrazhina T. V.

Influence of elastic pliability of manipulator links on precision of its positioning. I. Mathematical models of dynamics

124

Matviychuk K. S.

Sufficient technical stability conditions of forced dynamic states in control systems with variable structure

134

Domans'kyy P. P., Soroka O. I.

Optimization of form of highly supported pivots in problems of their stability in two measures

148

Terlec'kyy R. F.

Thermomechanical behavior model of multicomponent deformable low electroconductivity solids in electromagnetic field. II. Statistical formulation of terms for electromagnetic field factor action on multicomponent solids

155

Kondrat V. F.

Averaged magnetic field and mechanical stresses at magnetoelastic vibrations of electroconductive layer
