Year 2003, Vol.46

Vol. 46, No.4, L'viv 2003

CONTENTS

Antonova T. M.

Convergence of branched continued fractions with complex elements and their even parts 7

Hladun V. R.

Conditions of convergence and stability of branched continued fractions with negative partial numerators 16

Baran O. Ye.

Estimations of speed of convergence of interpolation process based on branched continued fraction with unequal variables 27

Manzij O. S.

Estimation of speed of convergence of Nörlund continued fraction 33

Dmytryshyn R. I.

On some regions of convergence of multidimensional \sqrt{J} -fraction 39

Hoyenko N. P.

Application of multidimensional analogue of Worpitzky theorem to investigation of convergence of hypergeometric Lauricella functions expansion in branched continued fractions 44

Nedashkovskyy M. O.

Convergence criteria of matrix branched continued fractions 50

Pagirya M. M.

On function approximation effectiveness of some types of interpolation continued fractions	57
<i>Chyp M. M.</i>	
Method of moments for function representation by series and integral	65
<i>Myl' o O. Ya., Pipa H. M., Storozh O. G.</i>	
On Weyl function and extremal extensions of semi-smooth restriction of positively defined operator	73
<i>Kyrchei I. I.</i>	
Analogue of adjoint matrix over skew field with involution	81
<i>Symotyuk M. M., Medvid O. M.</i>	
Problem with integral conditions for linear partial differential equations with constant coefficients	92
<i>Malitska H. P.</i>	
On stabilization of Poisson's integral for ultraparabolic equations	102
<i>Jabłoński W., Pękala A.</i>	
Stability of generalized mean value type functional equation	110
<i>Prokopovych I. B.</i>	
On differentiation with respect to bound tensor argument	114
<i>Kutniv M. V.</i>	
Modified three-point difference schemes of high accuracy order for the second-order monotone ordinary differential equations	120
<i>Bomba A. Ya., Prigornitsky D. O.</i>	
Approximation of solutions to one class of inverse boundary-value problems on conformal mappings in multiply connected areas with control potential	130
<i>Slivka A. I.</i>	
Properties of solution to problem on rectangular membrane vibration under random initial conditions	138
<i>Rogowski B.</i>	

Torsion of fiber-reinforced composite with cylindrical interface crack	145
<i>Yevtushenko A. A., Ivanyk E. G., Rożniakowski K., Dobryansky I. M., Wypych W.</i>	
Model of thermal fracture of concrete during laser irradiation	154
<i>Kindratsky B. I., Sulym G. T.</i>	
Structural-parametric synthesis of metal work of linear motion module	162
Alphabetical index for 2003 (vol. 46)	170
